

The following list contains a selection of textbooks or handbooks that give an introduction to computer graphics or introductory detail to more complex areas in the discipline. An extensive bibliography of SIGGRAPH conference technical contributions can be found in the SIGGRAPH Proceedings and quarterly publication. SIGGRAPH also maintains the SIGGRAPH Online Bibliography, GRAPHBIB which contains over 17,000 computer graphics references. A technical discussion of this service can be found in the January 1993 SIGGRAPH Quarterly Newsletter. This service is available on the World Wide Web at <http://www.siggraph.org/publications/bibliography/>

Previous Course Notes for the Fundamentals and Overview of Computer Graphics course and this year's course #22, Introduction to Computer Graphics also contain bibliographies, as well as lists of graphics related resources.
